

emergency medical technicians were not trained to use it. So, of course, they called for help. A doctor arrived and defibrillated him.

After 8 months of limited duty, he was cleared to return to active duty and is currently assigned to the Office of Secretary of Defense.

Commander Hearing's outcome could have been tragic if the doctor had not been available. If the doctor had not been available, the EMTs, who were not equipped with an automated external defibrillator, AED, would have likely watched Commander Hearing die.

Commander Hearing knows how lucky he is today. His experience stands in contrast to another incident at the Pentagon in March of 1998.

□ 1245

Army Colonel Mike Moake was exercising in the Pentagon Athletic Club early one morning when he experienced a sudden cardiac arrest. Paramedics were called, and bystanders performed CPR on Colonel Moake. Medics arrived more than 20 minutes after his collapse and defibrillated him. They started his heart, but by that time Colonel Moake had suffered irreversible brain damage. Unfortunately, he died 2 weeks later.

If an automated external defibrillator had been available in this case, Colonel Moake's chances of survival would have improved immeasurably. Partly as a result of Colonel Moake's tragic death, the Pentagon is procuring and installing several AEDs. After Commander Hearing's experience in Fallon, Nevada, the Navy procured AEDs for the clinic and ambulances at several other military bases.

The American Heart Association and American Red Cross objective is to advance legislation like the Cardiac Arrest Survival Act so others do not have to die or barely escape death before AEDs are made accessible to them.

Bob Adams also had a dramatic experience that I also would like to share, Mr. Speaker, with my colleagues. This occurred on July 3, 1997. Bob Adams was walking through Grand Central Station in New York City when his heart suddenly stopped and he collapsed. He was 42 years old, a lawyer in a firm of 450 people, a husband, and a father of three young children. He was in perfect health and always had been. From the time he played collegiate basketball at Colgate College up to his current avocation as a NCAA basketball referee, health was a nonissue to him.

Nevertheless, without warning, without any history of heart disease, he went into cardiac arrest the day before a holiday weekend, in a location through which half a million people pass every day.

For Bob, timing was everything. On July 2, the day before he collapsed, the automated external defibrillator that

the Metro North Commuter Railroad had ordered for use in Grand Central Station had arrived and the staff had been trained in its use.

Bob's heart was stopped for approximately 5 minutes while the AED was put in place. It was unpacked from its shipping box and everyone hoped it had come with charged batteries. Thanks to the trained staff at the station and an EMT who happened to be present, his life was saved.

Doctors have never discovered what happened to his heart. It simply stopped. Whatever it was, he and his wife Sue, along with their three children, Kimberly, Ryan and Kyle, are very glad there was an AED at Grand Central Station.

Please join with me in cosponsoring H.R. 2498, the Cardiac Arrest Survival Act, and help save lives.

TWO FLOODS AND YOU ARE OUT

The SPEAKER pro tempore (Mr. PETRI.) Under the Speaker's announced policy of January 19, 1999, the gentleman from Oregon (Mr. BLUMENAUER) is recognized during morning hour debates for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, the goal of livable communities is to make our families safe, healthy, and economically secure. Witnessing the devastation that has occurred this last week in the southeastern United States is painful to watch. Thirty-five known dead; others still unaccounted for. Imagine the suffering and disruption of lives and business. It has shown us once again how vulnerable millions of Americans are to natural disaster. The worst floods in years, unforgettable images of disaster, entire families wiped out. We need to help those who are suffering now, but we also need to take steps to prevent suffering like this in the future because it will happen again.

Hurricane experts suggest we are emerging from a relatively calm weather period to a more active destructive one. Increasing development pressures are resulting in building homes in flood plains around rivers, lakes, and on our coasts. One does not have to believe in global warming to know we have a problem, and it is getting worse.

We have to begin to deal with this in a sensible fashion. We need to look at where we build on coasts and developments in wetlands. We need to look at how we build. Even now there is a battle raging in North Carolina, ironically, about their building codes, arguing over, for instance, whether there should be protections for windows—like storm shutters.

When we have already built, we need to look at how we can best protect property and lives from the devastating impact of natural disaster. Government, in fact, bears some responsibility for allowing and indeed fa-

cilitating homes in harm's way by subsidizing repeated flood losses through the National Flood Insurance Program.

Along with the gentleman from Nebraska (Mr. BEREUTER), I have proposed legislation to provide significant new assistance for those who are most at risk to provide \$400 million additional from the years 2001 to 2004 to help flood-proof or relocate people who are facing the greatest risk from repetitive flood loss, the people most in harm's way.

If an offer of mitigation or relocation would be refused under our proposal, then at least the residents who decide to stay in harm's way would be at least required to pay the full cost of their flood insurance, as those who already live in homes that were built or substantially improved starting in 1975 already do. The intent here is not to punish but is to take away the incentive that people are given by the Federal Government to continue to live in hazardous circumstances.

The bill's name, Two Floods and You Are Out—of the Taxpayers' Pocket, might be a bit provocative but the issue goes far beyond money. The goal of the two floods bill is not to eliminate the flood insurance but, rather, the goal is to protect the lives of Americans who live in the path of frequent flooding, to protect the flood insurance program for the 4 million current policyholders, and to protect the American taxpayer.

The flood insurance program cannot continue as it is now. There is a deficit right at this moment of almost three-quarters of a billion dollars and it is climbing. Two percent of the policyholders have claimed 40 percent of all flood insurance payments since 1978. Many of them have chosen to live, sadly, in these areas of greatest conflict.

There is a home in Texas that has received over \$806,000 of flood insurance in 16 different events in less than 20 years, and the home is worth only \$114,000.

The question then becomes, should the Federal Government be in the business of providing an incentive for a small number of people to stop and continuously risk not just their property but their lives and those of their families and their neighbors.

Nicholas Sparks in this Sunday's New York Times Magazine suggests that, well, maybe the answer is yes. He plans to rebuild in a hurricane devastated sand dune on the Carolina coast.

I think that the majority of Americans would disagree. If there is a compassionate way to provide an incentive for people to move out of harm's way, that is what we should consider. If there is a way to provide that incentive while also protecting the flood insurance program and the American taxpayer, then that approach should be implemented as soon as possible.

There are ways to protect lives: The flood insurance program and the taxpayer. The Two Floods bill would provide assistance to those who are most in danger to help them move to higher ground or to flood-proof their home. The money spent to move them from harm's way protects the lives of families that live by them and protects the health of the flood insurance program by ending the danger of repeated damage claims.

Putting people, their families, and their neighbors who try to save them at risk does them no favor. Encouraging people we know to suffer repeated loss and threat is a waste of more than taxpayers' money. The loss of property, business, and human life is a tragedy we can help prevent. I urge my colleagues to support reform of the national flood insurance program.

TRIBUTE TO FELIX TRINIDAD, A NATIVE SON OF PUERTO RICO

The SPEAKER pro tempore. Under the Speaker's announced policy of January 19, 1999, the gentleman from Puerto Rico (Mr. ROMERO-BARCELÓ), is recognized during morning hour debates for 5 minutes.

Mr. ROMERO-BARCELÓ. Mr. Speaker, I would like to take this opportunity to congratulate Felix "Tito" Trinidad, a native son of Puerto Rico, on his tremendous victory in the world welterweight title fight this past Saturday, September 18. Tito's victory over his talented and worthy opponent, Oscar De La Hoya, has touched off one of the largest and most passionate celebrations in the long and storied history of sports in Puerto Rico.

Both fighters brought impressive credentials to this bout. Each one was undefeated, with Trinidad having won 35 straight matches and De La Hoya 31 straight victories. Public interest for a bout between these two ran high and once the match was set, anticipation reached a fevered pitch; and the fans who watched this clash on Saturday night were treated to a tremendous spectacle.

De La Hoya fought confidently and appeared to have a lead midway through the fight, but Tito showed the heart of a champion by coming back to win the later rounds and, with them, the bout. His perseverance against a great opponent and the tenacity he showed in overcoming the deficit he faced was an inspiration for all of us.

Nowhere is Tito's victory appreciated more than in Puerto Rico. We are intensely proud of our native son who has brought us great honor. Even before his victory on Saturday, Tito was recognized as one of the heroes of the long and storied history of sports in Puerto Rico.

Of course, Puerto Rico's sports history focuses heavily on America's national pastime, baseball, a game that

Puerto Ricans have embraced with an unrivaled passion. Our heroes include the legendary Roberto Clemente, known as much for his acts of humanitarian compassion as for his baseball skills, and such current stars as Juan Gonzalez, Ivan Rodriguez, Roberto and Sandy Alomar, Edgar Martinez, and Bernie Williams, to name a few.

Tito's victory on Saturday night adds another significant chapter to the great history of Puerto Ricans distinguishing themselves in the world of sports.

I hope other Members of this body will join me in congratulating Felix Trinidad on his great victory over his outstanding opponent, Oscar De La Hoya, on Saturday night. All of Puerto Rico is proud of you, Tito, and so are your fellow American citizens who saw your outstanding display of courage and tenacity. You show the true mettle of a champion, the stuff heroes are made of. You are an example to our youth in Puerto Rico and to all the youth across the Nation.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12 of rule I, the Chair declares the House in recess until 2 p.m.

Accordingly (at 12 o'clock and 56 minutes p.m.), the House stood in recess until 2 p.m.

□ 1400

AFTER RECESS

The recess having expired, the House was called to order at 2 p.m.

PRAYER

The Reverend David N. Morrell, St. Martin's Lutheran Church, Houston, Texas, offered the following prayer:

Let us pray. Gracious and eternal God, as these men and women who have been elected by the people of this Nation to represent them gather today, we ask Your blessing upon them. Grant that they be open to Your divine will and the guidance of Your Holy Spirit as they discuss, debate, and decide the issues before them.

On this new day, guide the leadership, the Members, and their staff that their efforts for equality, justice, mercy, and compassion will bear fruit in this Nation and in Your world.

In faith and hope we pray, in the name of Jesus Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from California (Mr. CALVERT) come forward and lead the House in the Pledge of Allegiance.

Mr. CALVERT led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, September 20, 1999.

Hon. J. DENNIS HASTERT,
The Speaker, U.S. House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope received from the White House on September 16, 1999 at 3:10 p.m. and said to contain a message from the President whereby he transmits to the Congress proposed legislation entitled, the "Cyberspace Electronic Security Act of 1999."

With best wishes, I am

Sincerely,

JEFF TRANDAHLL.

CYBERSPACE ELECTRONIC SECURITY ACT OF 1999—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 106-123)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on the Judiciary and the Committee on Government Reform and ordered to be printed:

To the Congress of the United States:

I am pleased to transmit for your early consideration and speedy enactment a legislative proposal entitled the "Cyberspace Electronic Security Act of 1999" (CESA). Also transmitted herewith is a section-by-section analysis.

There is little question that continuing advances in technology are changing forever the way in which people live, the way they communicate with each other, and the manner in which they work and conduct commerce. In just a few years, the Internet has shown the world a glimpse of what is attainable in the information age. As a result, the demand for more and better access to information and electronic commerce continues to grow—among not just individuals and consumers, but also among financial, medical, and educational institutions, manufacturers and merchants, and State and local governments. This increased reliance on information and
